

AMENDMENTS TO THE CLAIMS

1-19. (Canceled)

20. (New) An ink-printable coated sheet comprising a film of polyolefinic polymer coated with a coating composition comprising a urethane polymer component and an acrylic polymer component, and which coating composition further comprises a plurality of cross linkers, at least one of which is an aziridine or carbodiimide.

21. (New) The sheet as claimed in claim 20 in which at least one of said cross linkers is an aziridine.

22. (New) The sheet as claimed in claim 20, which additionally comprises at least one of oxirane and isocyanate cross linkers.

23. (New) The sheet as claimed in claim 20, in which the coating composition is applied without a primer layer.

24. (New) The sheet as claimed in claim 20, which is water resistant, solvent resistant and alcohol resistant.

25. (New) A printable label and/or graphic arts display comprising a coated sheet as claimed in claim 20.

26. (New) A method of preparing an ink-printable coated sheet which comprises coating a composition comprising a urethane polymer component, an acrylic polymer component and a plurality of cross linkers, at least one of which is an aziridine or carbodiimide, on a film of polyolefinic polymer.
